Figure your cost per piece by taking your desired length and finding the number of pieces per skid.
 Multiply the number of pieces per skid by the length of each piece in inches and divide by 12.
 Multiply that number by the price per foot. For example, 2 x 2 x .120 x 48" has 2808 pcs = \$919.91 / Skid

The cases below are priced at skid quantity (27 cs / skid). They are also sold in case quantity at \$0.04 / piece. ONE SKID MINIMUM ON ALL OTHER SIZES			6"-14" Lengths have 12% upcharge
